

TECHNICAL DATA SHEET

VIVA (Powder)

(6-6-43 + TE)

VIVA 6-6-43 +TE (Powder w/w) :

Is water soluble fertilizer , Contains : Nitrogen , Phosphorous , Potassium.

TYPICAL ANALYSIS:

Product Name	VIVA 6-6-43 + TE
Type of Product	Water soluble fertilizer supply essential nutrients for plants .
Appearance	Powder
Color	Red
Water Solubility	100% soluble Min Sol 200 g / l
pH value 5% in distilled water	3.5± 0.5
Composition (W/W)	<p>Total Nitrogen (N): 6 % Source: 84% Urea 16% Potassium Nitrate</p> <p>Phosphorous (P2O5): 6 % Source : 100 % Monopotassium Phosphate</p> <p>Total Potassium (K2O): 43 % Source : 9 % Monopotassium Phosphate. 6 % Potassium Nitrate 85 % Potassium Sulfate. Amino Acid (A.A) Ppm 1350 Zinc EDTA (Zn) Ppm 450 Copper EDTA (Cu) Ppm 300 Manganize EDTA (Mn) ppm 390 Iron EDTA (Fe) Ppm 390 Boron (Boric Acid) Ppm 510 Molybdenium (Mol) ppm 27</p>

CHARACTERISTICS:

Is water soluble fertilizer ,Consist of **three nutrients** in one product to achieves good quality produce and high yield properties .

Nitrogen is an essential element in metabolism process and energy production in plants,that helps many enzymatic reactions within plant and prevent loss of energy .

Contains high quantity of **Potassium** ,which is used during fruiting stage until harvested to increase fruit size ,enhance quality of fruit ,increase plant resistance to frost and drought and treat deficiency of potassium and minor elements which leads to increasing production .

Contain **Phosphorus** which is enhance root development and ,so,a profitable usage of the nutrients and the water .

It's specially design for Fertigation and Foliar systems of soil grown vegetables, fruits, flowers, and lawns can be used in all type of Irrigation systems (Drip, sprinkler, central pivot, surface irrigation systems).

APPLICATION RATES AND TIMING:

APPLICATION RATE

plant	Application rate
For fodder, vegetables, and field crops in open crops	7-10 kg/ha and repeated as needed
Vegetables in protected crops	1 - 2.5 kg/500 m ²
Palm trees and fruit	70 g per tree or 7-10 kg/ha
Ornamental plants	5 - 10 kg/ha

TIMING :

VIVA will be used at all plant growth stages .

HOW TO USE

VIVAN will be dissolved in water at application rate.

COMPATIBILITY

Compatible with most known fertilizers and pesticides, its advisable to make compatibility test before use.

WARNING

- Keep out of reach of children.
- Do not use with alkaline product .

STORAGE

- Store product in its original containers tightly closed.
- Keep away from children ,food and drinks .
- Store in dry ,well ventilated place ,at room tempreture and away from direct sunlight .

PACKING

1 Kg ,5 Kg ,10 Kg ,15 Kg , 20 Kg ,25 Kg,50 Kg ,100 Kg ,200 Kg,1000 Kg.

TRANSPORT PRECAUTIONS

No special precautions are necessary for transport b air, sea, rail or road.
